DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Allowable Subject Matter

Claims 1-21 are allowed.

Reason for Allowability

The following is an examiner's statement of reasons for allowance: in combination with other limitations recited in the claims, the primary reason for the allowance is the including of the particular claimed features as following:

the insulating paper piece, for electric motors, comprising: two slot cell portions arranged in two slots of the stator core, in which insert portions of a single pole coil are received, and two phase insulation portions, a phase insulation portion connecting a respective end of each of the two slot cell portions so as to form loops, and disposed to face against coil end portions of the single pole coil.

After careful consideration, the Examiner concurs with the applicant's remark that Hitachi has layer insulating papers 4, 5 that have cord-like connection parts 6, 6a that made to comprise a plurality of bands. Also, Scherzinger's fig 3 shows an insulation that is fitted within one slot so that its two side wall (40) and flanges (36, 38) facing the opening of the slot, instead of the insulating piece that have that has two slot cell portions arranged in two slots of the stator core for receiving the winding therein, as in the claimed invention.

Thus, comparing to the prior-art of the record, none of the prior art references of the record, either stand alone or in combination, has taught or suggest the above-mentioned features in combination with other limitations recited in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
